

- 13** Use the **Direct-selection** tool to click on the curve so you can adjust the direction handles until the curves fit the template.

Scroll down for **Lesson 14**.

-
- 14 click-drag:** To place anchor points and pull out direction handles.
Note: Use the Layers palette to view “Bézier Lines”

HINT:
Remember to
make the
general shape
FIRST,
then go back and
adjust the curves.

IMPORTANT:
When curves don't fit as you go, you'll have to adjust your curves with the **Direct-selection** tool after you are done with the **Pen** tool (you'll have to deselect first).

Scroll down for **Lesson 15**.

-
- 15 Click-DRAG** to draw curves. **Click** the **Pen** tool to end object.
Use the Direct-selection tool to edit the curves.
Note: Use the Layers palette to view “Bézier Lines”

Next, choose **Lesson 16** from the **View** menu.
